**SAVUNMA  
VE HAVACILIK**

Issue 4/1o #140, Vol: 24

◆ **Keeping the Turkish Air Force in the Air**

Savunma ve Havacılık will present a look at the Logistics Command of the Turkish Air Force, detailing how this formidable NATO service is kept in the air with very high availability rates, while at the same time planning for the next decades where many new capabilities and systems are being recruited, as the future in the air is being created.

◆ **Artillery and Missile Systems**

Savunma ve Havacılık looks at Artillery and Missile Systems and how the Turkish Armed Forces meets its next generation requirements.

◆ **Anti-Armour Weapons**

Savunma ve Havacılık presents the variety of Anti Armour Weapons in use around the world and takes a look at recent developments in technology and the Anti-Armour modernization programmes of the TAF.

◆ **Light Infantry Weapons**

Savunma ve Havacılık reports on close combat systems, specifically hand-guns and machine pistols, as well as infantry weapons such as assault rifles and sniper rifles. TAF's current preferences in this field are also discussed.

◆ **Status Report: Peace Eagle Project**

Savunma ve Havacılık reports on the latest developments in Peace Eagle, one of the key projects of TuAF for the 21st century.

◆ **News RoundUps**

S&H will report on individual developments relating to the modernization of the Turkish Armed Forces [TAF] and update issues affecting those activities with news from the industry as well.
